

H.S. Dee Ring Bit K.K.-Conrad-Ultra

KK-Conrad-ULTRA bits take advantage of the exceptional sensitivity of the tongue. How can the sense of touch be stimulated to obtain the desired effect?

1. As the palate is narrower than originally assumed the lozenge in the center was shortened (no pressure on the palate)
2. The angle of the link was twisted by 45 degrees. This ensures that when the reins are pulled the rounded link rests fully on the tongue without squeezing it.
3. The tongue's sense of touch is utilized and clear instructions are given through the reins. Aurigan, with s.s. rings, 15 mm.

259487 - 12,5 cm, 13,5 cm, 14,5 cm

H.S. snaffle K.K.-Conrad-Ultra

KK-Conrad-ULTRA bits take advantage of the exceptional sensitivity of the tongue. How can the sense of touch be stimulated to obtain the desired effect?

1. As the palate is narrower than originally assumed the lozenge in the center was shortened (no pressure on the palate)
2. The angle of the link was twisted by 45 degrees. This ensures that when the reins are pulled the rounded link rests fully on the tongue without squeezing it.
3. The tongue's sense of touch is utilized and clear instructions are given through the reins. Aurigan, 18 mm with Aurigan rings.

251490 - 13 cm, 14 cm

H.S. snaffle K.K.-Ultra Dynamic RS

The ergonomically formed mouthpiece lies perfectly in the horse's mouth resulting in soft and even pressure on the entire tongue area, encouraging the horse to chew. In addition this bit supports the contact to the corners of the mouth in a very effective way, keeping the horse on the bit. The gentle joint in the middle which is angled forward - the characteristic feature of the KK ULTRA - makes it a very friendly bit. The mouthpiece is made of AURIGAN, the material that activates the chewing activity of your horse. The new DYNAMIC RS bit gives soft but very effective instructions for a better contact between horse and rider. 14 mm, with s.s rings.

251491 - 12,5 cm, 13,5 cm

H.S. pelhambit K.K.-Ultra Dynamic RS

Effol winter hoof gel

This hoofgel has been specially formulated to provide the hoof with what it needs to remain health in the wet and cold season. As a result of the treatment with Effol winter hoof gel the protective layer and the moisture in the hoof are regulated in a natural way. The moisture in the hoof remains in natural balance. This effectively prevents the hooves from becoming dried out. The supply of moisture guarantees healthy hoof growth.
